W. San Antonio Street Rehabilitation Phase I Beginning

New Braunfels, TX – Improvements on W. San Antonio Street will commence on Monday, February 19th as part of the city-wide streets improvements project from the 2013 City of New Braunfels Bond Program. Phase I of the project is expected to take a minimum of six weeks, weather and other factors permitting.

This initial phase will address the segment of W. San Antonio Street from N. Krueger Avenue east to N. West End Avenue. Traffic will be detoured from this segment during construction and delays should be expected in the area. Use of an alternate route is encouraged.

The rehabilitation project will also include the installation of new curbs and sidewalks.

Additional phases of the project will eventually extend the improvements from N. Krueger Avenue to the intersection of Spur Street.

For additional information, contact Nathan Garza, Project Manager, at 830-221-4082.
