Local Native Plant Society of Texas Chapter to Host Monthly Meetings at WCC

New Braunfels, TX — The New Braunfels chapter of the Native Plant Society of Texas will be hosting monthly meetings at the Westside Community Center, located at 2932 S. IH-35 Frontage Rd., beginning on Monday, Jan. 28, and continuing the fourth Monday of the month thereafter.

Meetings will be held from 6:15 to 8:30 p.m. from January through June and then August through November.

“The Westside Community Center is excited to be the host facility for the Native Plant Society series in 2019,” said Outreach Coordinator Jennifer Hernandez. “If you are hoping to learn more about native plants and their care or wanting to start a garden area in or around your home or business, come enjoy learning through this series.”

Meetings are free and open to the public.

The Jan. 28 program, “Connecting Blooms and Butterflies: Using Native Wildflowers to Attract Butterflies and Other Pollinators,” will be led by Guadalupe River State Park wildlife biologist Craig Hensley, who will provide an insightful look at native wildflowers and their pollinators with special focus on butterflies.

Attendees will learn which wildflowers are most attractive to butterflies as nectar sources for adults and as larval food sources, as well. Hensley and the Native Plant Society of Texas will include useful tips on identification of both plants and butterflies as well flowering times and when to expect which butterflies.

The Native Plant Society of Texas is a nonprofit organization dedicated to promoting research, conservation, and utilization of native plants and plant habitats of Texas through education, outreach, and example.

For more information about the Native Plant Society of Texas meetings, call the Westside Community Center office at 830-221-4630 or the main library at 830-221-4300.
