10. DESCRIPTION OF CHANGES:  This amendment is issued as a response to questions. Questions and Answers are attached.						
Except as provided herein, all terms and conditions of the document referenced above remain unchanged and in full force and effect.						
11a. SIGNATURE OF OFFEROR OR CONTRACTOR				CITY OF NEW BRAUNFELS, TEXAS  <i>Greg Gutierrez</i>		
11b. PRINTED NAME AND TITLE		11c. DATE		SIGNED <b>Greg Gutierrez</b> Buyer		24-Mar-23 Date

RFP 23-022 FD Door Replacement Solicitation Amendment 1

1. Will you be picking a specific RAL color before bid closing date? I could send you a color chart, custom color matching is also available
  - a. Doors should be a shade similar to fire engine red
2. The door pictured is insulated, will this be a requirement?
  - a. No insulation is necessary
3. The door pictured shows 6 rows of 3 lights that are not centered, we can do the lights virtually all across the slat and as many rows as you like, will you be specifying the number of lights/rows?
  - a. 6 rows of 3 lights each is acceptable
4. Will you be calling out certain manufacturers for the equipment
  - a. We are open to any manufacturer
5. Will you be calling out specific spring cycle life? Most manufacturers can do up to 100,000 cycles on standard roll up doors but higher cycle life up to 1,000,000 are available at a premium. These doors are spring less and 3 times faster than a standard rollup door which would be good for a fire station. I would be happy to send you more information on these types of doors.
  - a. A spring cycle life of 100,000 cycles is acceptable. Please submit any information you have on springless doors with your proposal.
6. What accessories would you be interested in? the most common fire station accessories are red/green signal lights, 6' light curtains, buzzers that sound until the door is closed and remote controls
  - a. Please include pricing for 6' curtain of lights, remote controls, and red/green signal lights. Buzzers are not necessary.
7. We normally exclude any electrical and conduit, replacing the trolley operators with coiling door operators will require moving the electrical service and possibly items on the walls next to the existing doors. Will you be contracting someone else to move the electrical and any items next to the doors.
  - a. Please include electrical work if possible. If not possible, we will consider your submission anyway.
8. Item 4.2 Scope of work states we must be able to start work 30 days from contract signing, the lead times on these doors, especially powder coated could be about 60 days from most manufacturers, could that time frame be changed to 75 days?
  - a. The 30 day start time is to get the project rolling. We understand there may be delays in lead time for the items. Please include lead time in your proposal.
